Diego Armando Pinta Cuasquen

Software Engineering student · Universidad Cooperativa de Colombia (UCC) · Fifth semester

diarpicu2022@gmail.com github.com/diarpicu2022-commits

PROFILE

I combine Software Engineering and Electronic Engineering to build complete systems: from sensors and microcontrollers to backend, frontend and clear interfaces.

TECH STACK

Languages	C/C++ · Java · TypeScript · JavaScript · Python · Kotlin · GDScript
Frontend & backend	React · Next.js · Vite · Tailwind · Spring Boot · NestJS · Express · FastAPI
Data	PostgreSQL / Supabase · MongoDB · Redis · SQLite
Electronics	ESP32 · Arduino · Automatic control

EDUCATION AND EXPERIENCE

Software Engineering · fifth semester
Universidad Cooperativa de Colombia (UCC)
Training in software development, databases and interface design, applied in course projects.

Academic software and hardware projects
Universidad Cooperativa de Colombia (UCC)
Building IoT systems, web apps and games, from sensor integration to the final interface.

SELECTED PROJECTS

Ecos de la Tierra — TypeScript, React
The portfolio's flagship: an interactive experience about the land and nature, built end to end.

SISCAN — ESP32, C/C++, REST API, SQL
Monitoring system where microcontroller-connected sensors send readings to an application for review.

AgroPulse — Arduino, ESP32, TypeScript
IoT platform for tracking farm variables, joining field hardware with a visualization dashboard.

CampusWatch / Agenda — TypeScript, React
Academic tool that keeps campus activities, schedules and to-dos in one place.

NotaScan — Python, TypeScript
App to digitize and organize class notes.

Harmonia — TypeScript
Additional archive project focused on a polished user experience.

EcoVolt — Arduino, C/C++
Energy project combining electronics and software to measure and present consumption.

SETPasto+ — Java, Spring Boot
Service application for the city of Pasto.

Tower Defense — GDScript, Godot
Tower defense strategy game.

Proxy IA — Python, FastAPI
Middleware service that connects applications with artificial intelligence models.
